Xiaomi Watches

According to Data Act, some Xiaomi wearable watches are classified as connected products. The products sold in the EU are as follows:

1	Xiaomi Watch S3
2	Xiaomi Watch 2 Pro
3	Xiaomi Watch 2
4	Redmi Watch 4
5	Redmi Watch 5 Active
6	Redmi Watch 5 Lite
7	Xiaomi Watch S4
8	Xiaomi Watch S4 41mm
9	Redmi Watch 5

The data collected by Xiaomi watch products may vary depending on the device versions, models, and features. For specific details, please refer to the product manual, user agreement or privacy policy of the Mi Fitness App, or contact the Xiaomi compliance team through http://dataact.mi.com/.

In general, Xiaomi watch products process the following product data and related service data. If you wish to access, retrieve or erase relevant data, please visit http://dataact.mi.com/.

1. Product Data

Data Type	Data Processing Purposes	Data Format	Estimated Volume	Whether generating data continuously and in real-time	On-device or Cloud Storage	Intended Retention Period
Firmware power consumption	Collect power consumption data over a certain period of time for analyzing battery life.	JSON	5-15 bytes per time	No	It is stored locally first, and will be uploaded to the cloud.	The relevant data will be stored for the most recent 365 days, with a rolling deletion every other day.
Power Consumption	Power consumption when a certain function is enabled: such as watch face, all-day monitoring functions, regular function usage power consumption, watch face power consumption, for analyzing product battery life.	JSON	5-15 bytes per time	No		

Power Consumption Mode	Collect power consumption data for different device modes: such as long battery life mode or AOD mode, for analyzing battery endurance in different modes.	JSON	5-15 bytes per time	No		
Charging Information	Collect charging information of the device, such as the number of charging times, initial charge level, and charging status for analyzing battery life.	JSON	5-15 bytes per time	No		
Usage Information	Collect information generated by a user's single use of a feature, such	Json	5-15 bytes per time	No		

	as NFC, answering calls, GNSS usage duration, and frequency for statistical purposes.					
System Operation	The number of times the collection device system has been shut down, restarted, or reset to factory settings, for statistical purposes.	Json	5-15 bytes per time	No		

2. Related Service Data

Xiaomi Watch is a smart device that can connect to mobile devices and is managed through the Mi Fitness App. The Mi Fitness app is a platform for connecting Xiaomi smart wearable devices, allowing you to manage these devices and view the data they measure, such as your sleep data, exercise records, calories burned, and daily step count, or set up your Xiaomi Watch through the Mi Fitness App.

Data Nature	Data Processing Purposes	Estimated Volume	Storage Method	How to Access Data
Non-personal data	Supports watch remote control for TV (only applicable to certain models,	Depending on user usage	On-device storage	The watch-side storage is generally inaccessible; if a bug log is generated, it will be stored in the cloud

				and can be indirectly obtained through Xiaomi.
	operated through the "Xiaomi TV Remote" app embedded in the watch)			
Non-personal data	Collect data such as screen size, device model, device identifier for adapting to the corresponding watch face size.	5-15 bytes per transaction	Data is stored within the app on users' cellphones, and it will be deleted if users uninstall the app; it is also stored in the cloud during the period of service performance.	The log will be recorded, stored locally, and can be accessed via the APP - My tab - About - Tap the Xiaomi Health logo (Android only).

Data Retention Period	Data holder's identity, name, and contact information	Contract Term; How to terminate it?	Who is the holder of the trade secret (if any)?
The relevant data will be stored for the most recent 365 days, with a rolling deletion every other day.	Xiaomi Technology Netherlands B.V. Prinses Margrietplantsoen 392595 AM, The Hague, The Netherlands http://dataact.mi.com/	In general, the contract for providing related services will be valid until consumers terminate it or withdraw their consent for data processing. The general way for terminating the contract is to withdraw consent through the Mi Home/Xiaomi Home app or by visiting http://dataact.mi.com/.	Xiaomi Technology Netherlands

Will Xiaomi use such related service data and for what types of purposes?

Yes, Xiaomi uses this kind of data so as to fulfill the purposes as indicated above.

Will Xiaomi share these data with third parties?

In general, the answer is negative. Xiaomi will ask for the consent of users in the cases that it needs to invite third parties to provide services for users.

Users' Right to Lodge a Complaint

According to Article 3 (3) (g) of Data Act, users have the right to lodge a complaint with the supervisory authority of the Member State regarding, among others, data disclosure or sharing.

At the time of publication of this document, EU Member States are working on designating the authorities of accepting complaints related to Data Act, and we will keep you updated if there are any progress.

3. Virtual Voice Assistant

You may use third-party virtual assistants' services (such as Google Assistant, Chromecast, Alexa, etc.) through Xiaomi watches (as supported by particular models), and you typically need to log in to your third-party account and accept user terms or privacy policies. If you use these services, your devices may generate corresponding related service data. According to Data Act, these third parties are the holders of the data. Please contact them for information regarding such data.
