In general, the product data and related service data processed by Xiaomi smart humidifier are as follows. If users want to access, retrieve or delete data, please visit http://dataact.mi.com/.

1. Product Data

Data Type	Data Processing Purposes	Data Format	Estimated Volume	Whether it can be generated continuously or in real time	On- device or Cloud Storage	Intended Retention Period
Air Quality	 monitors real-time air quality and automatically adjusts purification speed. 	JSON	about 23 bytes	Real-time generation	Stored on-device first, then uploaded to the cloud.	As per the needs of contract and service performan ce. In general, users can
Mode Status	 Check if the status switch for modes (such as night mode) is successful. Check if the child lock has been successfully activated 	JSON	about 25 bytes	Collect only when the condition is triggered	Stored on- device first, then uploade d to the cloud.	delete the data themselves or ask Xiaomi to delete it. The ordinary intended retention period ranges from 90 days to 550 days.

Fault Monitoring	Identify Faults	JSON	about 23 bytes	Real-time generation		
	To send filter replacement reminders to users through Mi Home/Xiaomi Home app and recommend users changing filters when necessary.	JSON	about 26 bytes		Local storage only	

2. Related Service Data

This product is compatible with the Xiaomi home app. You can use the Xiaomi home app to add and control your device, and to make the humidifier interact with other smart home devices. If you use such digital services, the following related service data will generally be generated.

Use the Xiaomi Home app from your smartphone to enable purification when away from home.

Data Nature	Purpose of Data processing	Estimated Volume	Storage Method and Retention Period	How to Access Data
Non- personal data	 Customized purification area Choose the optimal speed in one step 	approximately 25 bytes	Cloud storage; As per the needs of contract and	Please contact http://dataact. mi.com/

	In manual mode, you can set the coverage area and customize the speed according to your preference. (This feature is mainly provided by the Xiaomi Smart Air Purifier 4 series)		service performance. In general, users can delete the data themselves or ask Xiaomi to delete it. The ordinary intended	
Non- personal data	Remote operation of the purifier (turn on, turn off, set notification sounds, etc.); set the time to turn on or off the purifier; Monitor the status of switches such as child lock and pet safety lock.	approximately 25 bytes	retention period ranges from 90 days to 550 days.	

Data holder's identity, name, and contact information	Contract term; How to terminate it?	Who is the holder of the trade secret (if any)?
Xiaomi Technology Netherlands B.V. Prinses Margrietplantsoen 392595 AM, The Hague, The Netherlands http://dataact.mi.com/	In general, the contract for providing related services will be valid until consumers terminate it or withdraw their consent for data processing. The general way for terminating the contract is to withdraw consent through the Mi Home/Xiaomi Home app or by visiting http://dataact.mi.com/.	Xiaomi Technology Netherlands

Will Xiaomi use such related service data and for what types of purposes?

Yes, Xiaomi uses this kind of data so as to fulfill the purposes as indicated above.

Will Xiaomi share these data with third parties?

In general, the answer is negative. Xiaomi will ask for the consent of users in the cases that it needs to invite third parties to provide services for users.

3. Users' Right to Lodge a Complaint

According to Article 3 (3) (g) of Data Act, users have the right to lodge a complaint with the supervisory authority of the Member State regarding, among others, data disclosure or sharing.

At the time of publication of this document, EU Member States are working on designating the authorities of accepting complaints related to Data Act, and we will keep you updated if there are any progress.

4. Virtual Assistants

You may use third-party virtual assistants' services (such as Google Assistant) through Xiaomi air purifiers, and you typically need to log in to your third-party account and accept user terms or privacy policies. If you use these services, your devices may generate corresponding related service data. According to Data Act, these third parties are the holders of the data. Please contact them for information regarding such data.
